

# Learning Toolbox for ePosters

used by conference organisers, scientific associations and universities across the world

## The ePoster solution for virtual and in-person events

Step away from the old paper poster model and delight your authors and delegates with Learning Toolbox's fully interactive, multimedia ePosters that work equally well in **virtual, hybrid and in-person events**. Our ePoster showcase can now be embedded into a wide range of **virtual event platforms** for a smooth delegate experience.

### Rich ePosters at your fingertips

The **easy to use drag-and-drop editor** allows authors to create rich, interactive ePosters to present and share their work. Delegates browse and interact with the ePosters in a normal **browser** or using our **Android and iOS app**.

A Learning Toolbox ePoster can contain **many different multimedia resources** such as videos, images, audio, apps, presentations, twitter feeds and links to interactive online resources.

### Search and browse onsite and online

Use our **mini-poster feature** to give the interactive ePosters a physical presence at your in-person event. Simply print the mini-posters and display them prominently at the venue. They act as an advert for the ePoster and delegates simply **scan the mini-poster's QR code** with their phone and start exploring. Save on expensive screens to display the ePosters onsite.

### Present and discuss

The ePosters can be viewed and presented online on **any device** with a web browser or on our native Android and iOS apps. This **cross-platform** flexibility means that they can be easily used onsite and online without the need for specialist equipment. Conferences have used our ePosters within many exciting presentation and discussion formats including **poster pitching sessions**, **round table discussions** and **workshops**.

Use our **online showcase feature** to allow delegates to browse, search and interact with all the event's ePosters. This showcase can be **embedded within your Virtual Event Platform** or **association website**. Learning Toolbox also provides the showcase as a standalone webpage.

## Richer engagement

Each ePoster has its own **chat area**, where delegates can post questions and discuss the work with the author. This rich discussion becomes part of the ePoster itself and can continue beyond the conference.

Each ePoster has its own unique **web link and QR code** for quick sharing. This greatly increases the reach of the authors' work, encouraging engagement and promoting the event.

Authors can even allow delegates to add content to a **shared area of their ePoster**, collecting links to relevant other research or ideas for further development.

And the conference can allow authors to **update their ePoster** based on discussions at the event, encouraging learning and development.

## What our happy users and customers say

### Authors and delegates

- "All conferences should be using this now."
- "I actually really loved this platform."
- "A really unique way to create something in a fun and interactive way."
- "Great for networking and presenting!"
- "Making the ePoster was a really fun and enjoyable creative process"
- "Offers so much more than I thought was possible! The prospect of being able to get a little creative is really exciting!"
- "You have done something extraordinary in the world. This is a profound shift in how the future will engage with research."

### Event organisers

- "What a great experience! So much more than traditional poster sessions."
- "It is really a remarkable system. Easy to use, intuitive, powerful and versatile. An e-poster development environment without equal."
- "Working with their team was easy and enjoyable, and the software is amazing."
- "Above and beyond what we had hoped for, both for us and our ePoster authors."
- "You can tell it was designed by people who understand conferences."
- "Kubify is an exceptional company to work with."
